

Lose the paper, not the information!

Tired of searching through paper forms to locate the information you need to make decisions?

If the inefficiency of processing, storing and inevitably retrieving the paper-based forms received from providers is placing a stranglehold on your organization's productivity, turn to AdminisTEP for help. AdminisTEP offers payors and their provider networks a single solution to translate paper-based forms into electronic transactions by using document imaging, optical character recognition (OCR), and "vertexing" to verify data entry.

AdminisTEP is Legacy's transaction exchange portal that resolves HIPAA-compliance translation issues and extends the functionality of payor host systems. AdminisTEP bridges the gap between providers and payors by directly connecting them with each other for transaction exchanges.

AdminisTEP's document imaging, OCR and vertexing capabilities are yet another solution for payors to outsource their transaction processing and electronic data interchange (EDI) infrastructures. Payors using AdminisTEP to eliminate

paper-based forms realize significant benefits, including:

- Getting information into the hands of decision makers — no more searching for forms or document images to locate a single piece of data. AdminisTEP's reporting capabilities enable all users to rapidly locate the data they need in a matter of minutes via a Web browser.
- Scanned data is indexed and searchable, and is displayed in familiar formats, such as CMS-1500, UB-92 and other common formats.
- Vertexing verifies data input via OCR software, significantly surpassing the accuracy of manual data entry at a fraction of the cost.
- Reduced administrative costs and increased productivity.

Concerned about OCR integration nightmares? No worries. It's as easy as dropping a letter in the mail.

AdminisTEP makes it easy for payors and providers to use and benefit from OCR technology. Simply send the paper forms to

**No infrastructure
or investment
needed.
Just subscribe
the service.**

Legacy for processing via mail, courier or overnight delivery. Legacy scans the forms, uses OCR technology to capture data, verifies the data entry, and places the information within AdminisTEP. Users access AdminisTEP via the Web to send or receive transactions, or view reports.

Both payors and providers benefit from the solution. AdminisTEP enables payors to offer a cost-effective, easy-to-

use solution to their provider networks without requiring up-front investments in infrastructure or implementation. Plus, payors benefit from the increased efficiency inherent in a paper-free environment.

Providers can use AdminisTEP translate paper-based forms into electronic formats, whether they are sending or receiving the forms. For example, explanation of benefits (EOBs) forms received from payors can be translated into electronic formats, and so can the CMS-1500, UB-92 and other forms that providers send to payors.

Make the switch to AdminisTEP

With AdminisTEP, healthcare organizations lose the paper, not the claims. And with AdminisTEP being a hosted, Web-based solution, healthcare organizations do not have to expend their precious IT talent to implement and deploy the solution.

Tired of processing paper? Then contact Legacy today to find out how AdminisTEP can solve your paper forms and document imaging challenges.
